MATERIALS:
• 3 different color beads to choose from (amount required varies based on length of words)
• Pipe cleaner or string
• Scissors

STEPS:
1. Each letter, both capital and lowercase, has a unique eight digit code. Assign a color for 0 and different color for 1. Example: 0 = Green, and 1 = Orange. If making a project like a bracelet or necklace with multiple words, assign a third color for the space between words. Example: Space = White.
2. The four-leaf clover example shown below is St. Patrick’s Day themed, spelling “luck” with each leaf being a different letter of the binary alphabet.
